CONTINUED EXAMINATION UNDER 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/20/2008 has been entered.

I. ACKNOWLEDGEMENT OF REFERENCES CITED BY APPLICANT

2. As required by **M.P.E.P. 609(C)**, the applicant's submissions of the Information Disclosure Statement dated March 20, 2008 is acknowledged by the examiner and the cited references have been considered in the examination of the claims now pending. As required by **M.P.E.P 609 C(2)**, a copy of the PTOL-1449 initialed and dated by the examiner is attached to the instant office action.

II. TERMINAL DISCLAIMER

3. The terminal disclaimer filed on July 05, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on the Application Number 10/726794, 10/726440, 10/726441,

Art Unit: 2181

10/726362 and 10/726350, and US Patent 7,177,329, 7,088,741 and 7,068,686 has been reviewed and is accepted. The terminal disclaimer has been recorded.

III. EXAMINER'S AMENDMENTS

OPTIONS AVAILABLE TO THE APPLICANT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by **37 CFR § 1.312**. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

AUTHORIZATION FOR THE CORRECTIONS BY THE EXAMINER

5. Authorization for this examiner's amendment was given in a telephone interview with Michael Ferrazano, having Reg. No. 44,105, on September 11, 2007. Accordingly, since a complete record of the interview has been incorporated in the instant examiner's amendment, no separate interview summary form is included in the instant office letter **MPEP § 713.04**.

CORRECTIONS MADE IN THE APPLICATION

The application has been amended as following:

IN THE CLAIMS:

The below described amendments to the claims are necessary to further clarify the claimed invention.

In claim 21, line 5, "... a unidirectional main link ..." should be replace with "... an unidirectional main link ...-.

In claim 21, lines 14-15, "... if the multimedia source device supports only analog data ..." should be replace with "... if the multimedia sink device supports only analog data ...-.

In claim 24, line 10, "... a unidirectional main link ..." should be replace with "... an unidirectional main link ...-.

In claim 24, lines 11-12, "... from the multimedia source device to the multimedia sink device ..." should be replace with "... from the multimedia source device to the multimedia sink device, the signal cable not including a clock line ...-.

In claim 24, line 15, "... at least one switch for setting an operational mode ..." should be replace with "... at least one switch for automatic setting an operational mode ...-.

In claim 24, line 17, "... if the multimedia source device support only analog ..." should be replace with "... if the multimedia sink device support only analog ...-.

In claim 25, line 3, "... having a main channel and an auxiliary channel ..." should be replace with "... having the unidirectional main channel and the bi-directional auxiliary channel ...-.

IV. DISTINGUISHING FEATURES RECITED IN THE CLAIMS

ALLOWABLE SUBJECT MATTER

6. Claims 3-7 and 21-27 are allowed.

The following is an **Examiner's Statement of Reasons for Allowance**. See MPEP 1302.14:

The primary reasons for allowance of claim 21 in the instant application is the combination with the inclusion in the claim that there are "... providing a coupling device including a signal cable comprising (i) a bi-directional auxiliary channel arranged to transfer information between the multimedia source device and the multimedia sink device and (ii) an unidirectional main link arranged to transport multimedia data packets from the multimedia source device to the multimedia sink device, the signal cable not including a clock line ... automatically configuring the coupling device, including determining if the multimedia source device supports only analog data; setting an operational mode of the coupling device to analog if the multimedia source device supports only analog data; determining if the multimedia sink device supports only analog data; setting the operational mode of the coupling device to analog if the multimedia sink device supports only analog data; setting the operational mode of the coupling device to digital if both of the multimedia source device and the multimedia sink device support digital data; packetizing only the video data to form a packetized video data stream formed of a number of video data packets; and passing the video

data packets by way of the unidirectional main link from the multimedia source device to the multimedia sink device, and wherein control signals are passed over only the auxiliary channel such that substantially all unidirectional main link bandwidth is used for transmission of video data only..." The prior art of record including the disclosures of Kori (US Patent 6,963,968), Hulvey (US Patent 5,940,137), Rogers et al. (US Patent 5,786,844) and Clark (US Patent: 5,949,437) neither anticipates nor renders obvious the above recited combination. Because claims 3-7 and 22-23 depend directly/indirectly on claim 21, these claims are considered allowable for at least the same reasons noted above.

The primary reasons for allowance of claim 24 in the instant application is the combination with the inclusion in the claim that there are "**... a signal cable for connecting the first interface to the second interface, the signal cable including (i) a bi-directional auxiliary channel arranged to transfer information between the multimedia source device and the multimedia sink device, and (ii) an unidirectional main link arranged to transport multimedia data packets from the multimedia source device to the multimedia sink device, the signal cable not including a clock line; a processor configured to determine if the multimedia source device supports only analog data, and to determine if the multimedia sink device supports only analog data; and at least one switch for automatic setting an operational mode of the configurable coupling device to analog if the multimedia source device supports only analog data, setting the operational**

mode of the configurable coupling device to analog if the multimedia sink device supports only analog data, and setting the operational mode of the configurable coupling device to digital if both of the multimedia source device and the multimedia sink device support digital data, in accordance with the determination of the processor, wherein the video data packets are passed by way of the unidirectional main link from the multimedia source device to the multimedia sink device, and wherein control signals are passed over only the auxiliary channel such that substantially all unidirectional main link bandwidth is used for transmission of video data only..." The prior art of record including the disclosures of Kori (US Patent 6,963,968), Hulvey (US Patent 5,940,137), Rogers et al. (US Patent 5,786,844) and Clark (US Patent: 5,949,437) neither anticipates nor renders obvious the above recited combination. Because claims 25-27 depend directly/indirectly on claim 24, these claims are considered allowable for at least the same reasons noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
